## Product

IT8000 Regenerative DC Electronic Load

# Energy Regeneration

## IT8000 Regenerative DC Electronic Load

### APPLICATIONS

- Batteries
- Natural energy
- Large capacity DC power supply test
- Power electronic equipments detection
- Aging test

*Your Power Testing Solution*

# IT8000

## REGENERATIVE DC ELECTRONIC LOAD

IT8000 series is a family of high power regenerative electronic loads with compact size. The highly integrated capability enables the e-load to simulate various e-load characteristics, and return the consumed energy back to the grid cleanly, saving costs related to energy consumption and cooling, meanwhile eco-friendly. With modular high power density design, IT8000 provide up to 18kW in 3U space. The power is expandable up to 2MW by master-slave parallelling and active current sharing. If you move into application of high power UPS, storage battery, PV battery, EV, energy storage system, ITECH can help you with IT8000 series high power regenerative electronic load.

## 01 IT8000 Regenerative DC Electronic Load

# Your Power Testing Solution

## IT8000 Regenerative DC Electronic Load

### Features

- Recover DC energy to local grid with efficiency up to 95%
- High power density up to 18kW in compact 3U rack space, expandable up to 2 MW by paralleling
- Output voltage up to 2250V
- Output current up to 8000A
- Adopts third-generation SiC technology
- Built-in waveform generator, support generating arbitrary waveforms
- LIST function, support importing LIST files by front USB
- Power accumulation function
- Battery test function, short circuit test function
- Full protection: OVP/OCP/OPP/OTP/UVP, Vsense anti-reverse connection protection, and voltage transient drop protection
- Built-in standard USB/CAN/LAN/digital IO interface, and optional GPIB/Analog&RS232 interfaces
- Support SCPI protocol, LabVIEW
- Operating mode:CC/CV/CP/CR/CC+CV/CV+CR/CR+CC/CC+CV+CP+CR

\*The regenerated power is for local grid purpose, not for public grid purpose.

### Applications

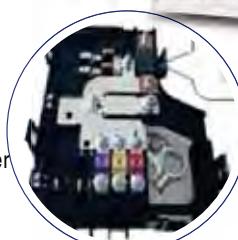

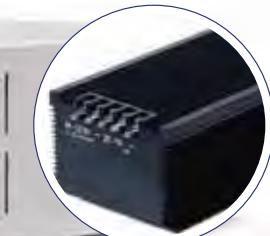

#### Multiple types of batteries Charge-Discharge Testing

Lead storage battery, Lithium battery, Power battery pack, Energy storage battery

#### Safety testing of mechanical systems with large capacity batteries

Unmanned vans, Nursing electric chairs, etc.

#### Aging test (automotive high voltage motor, fuse, relay) and small motors testing

Aging life testing for AC/DC, DC/DC converters

Tests for large capacity DC power supply such as ground electrical power

Evaluation test for fuel cells and stacks

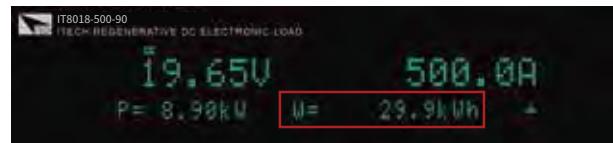

Detection and aging test for power electronic equipments

# Your Power Testing Solution

## IT8000 Regenerative DC Electronic Load

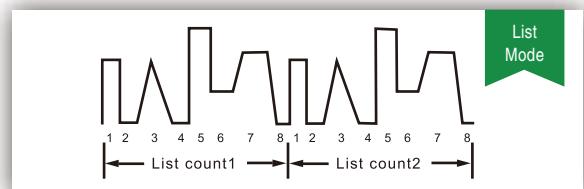

### Power accumulation function

IT8000 series regenerative DC electronic load uses the power electronic transformation technology on the premise of completing test power experiment to make output energy of measured power supply regenerated recycled and reused. Through the inside fast sampling of voltage and current, the regenerative power value can be observed on the front panel of IT8000 series, including voltage, frequency and power of each phase, as well as total power, total current regenerative and total historical regenerative power, which makes the energy saving effect much easier. Re-open after power failure, IT8000 series will continue to accumulate the regenerative power value based on the last power off value.

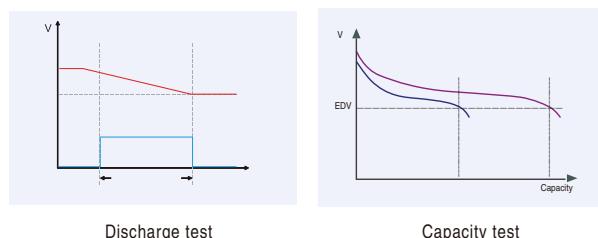

### List function

IT8000 series regenerative DC electronic load provides list mode, it can complete the complex arbitrary current change mode accurately and fast, and can synchronize with internal or external signals to complete multi-level loading precision test, which greatly save cost for customers. By editing the step value, pulse width and the slope of each step, IT8000 can generate a variety of complex sequences and help users to complete various loading waveforms test. In the CC mode, IT8000 series can set rising and falling speed.

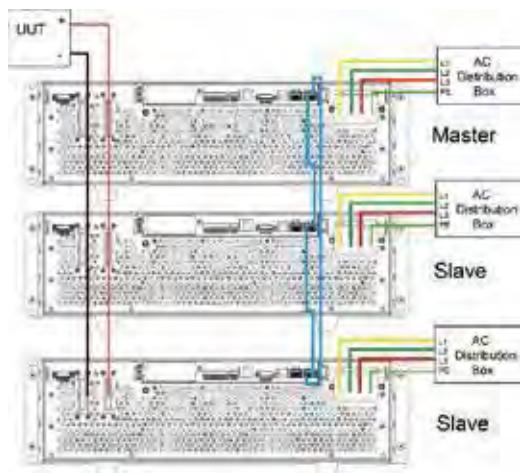

### Battery test function

IT8000 series regenerative DC electronic load simulate battery discharge test under CC mode, and support settable discharge cut-off conditions, such as cut-off voltage, cut-off capacity and cut-off time. When any of the three conditions are met, the discharge test will be stopped. Moreover, the battery voltage, discharge time and the discharged capacity can be observed during the test, which reflects the reliability of the battery and its remaining life.

### Patented parallel technology

- IT8000 has adopted ITECH parallel technology
- All the function and performance will be the same as standalone unit
- No need to calibrate after paralleling
- Fiber transmission, good for anti-interference
- Digital paralleling, fully insulated, good for protecting DUT

# Your Power Testing Solution

## IT8000 Regenerative DC Electronic Load

### Power regenerative and eco-friendly

With the power regeneration function, IT8000 can feed back up to 95% power instead of consuming it as heat. It not only save your cost of electricity, HVAC and cooling infrastructure, but also help to reduce carbon emission and impact on the environment.

**Production facility :** 24Hr/day x 7 work days x 52 weeks

Power	Electricity cost saved (appr. USD/year)	CO <sub>2</sub> emission reduced (appr. ton/year)
18 kW	20,914	149
36 kW	41,828	298
90 kW	104,570	745
108 kW	125,484	894
144 kW	167,312	1192

**R&D lab :** 8Hr/day x 5 work days x 52 weeks

Power	Electricity cost saved (appr. USD/year)	CO <sub>2</sub> emission reduced (appr. ton/year)
18 kW	4,980	35
36 kW	9,959	71
90 kW	24,898	177
108 kW	29,877	213
144 kW	39,836	284

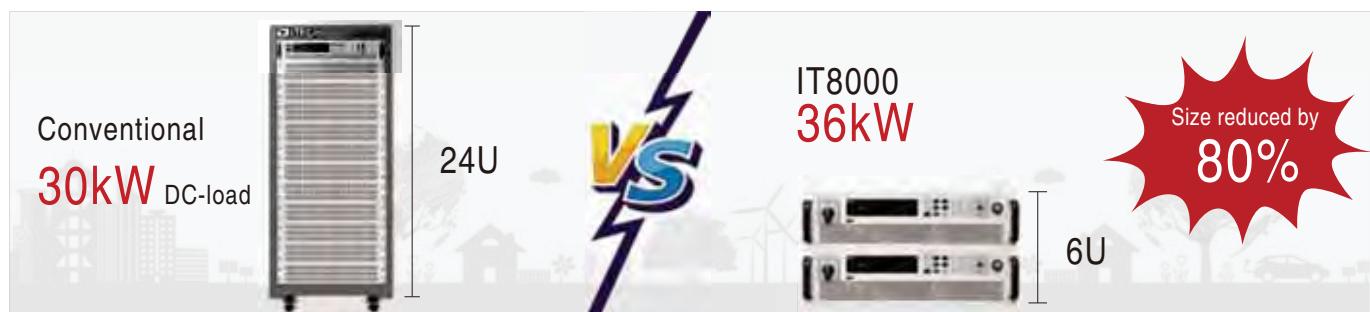

1. approximate electricity price 0.14USD/ kWh for industry facility in California

2. 1 kWh power consumption ≈ 0.997 CO<sub>2</sub> emission

\* The extra cost of air conditioning is not included.

### High power density

Conventional electronic loads are not only with high energy consumption, but also with very large size and weight. Energy consumption of a conventional electronic load with 30KW load is at least 24U, it is difficult to transport and the cost is higher. IT8000 series regenerative DC electronic load adopts high power density design of 18kW in only 3U high. Compared to conventional electronic loads, the size for IT8000 series is decreased by 80% under the same output power.

### Full protection

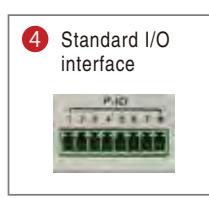

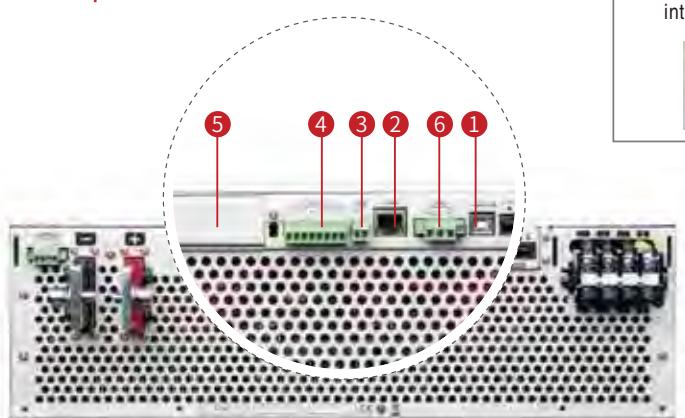

IT8000 series regenerative DC electronic load supports automatic detection of the grid state. When grid connection is suddenly disconnected or power down, IT8000 will be turned off. IT8000 series can achieve reliable on-grid function and anti-islanding protection function. IT8000 supports monitoring on DC input voltage and frequency, and supports OCP, OVP, OTP, OPP function.
